

At this point the “Sverdlovsk” road map is approved by the Sverdlovsk Ministry of Energy, Housing and Utilities and Regional Energy Commission and filed with the Deputy Governor of the Sverdlovsk region for signing. Besides, we received proposals of the Perm Government to revise the “Perm” road map, final version to be approved by the Interagency Board, liable for perspective development. Chelyabinsk Deputy Governor’s letter dated as of 15.11.2016 No. 09/6910 informed us of impossibility to enforce the “Chelyabinsk” road map in the Chelyabinsk region.

The Company’s grid development strategy comprises the following aspects:

1. Connection of new consumers to the Company’s networks with a view to foster sustainable development of the Urals economy and boost electricity transmission.
2. Construction of grid facilities with a view to eliminate electrical shortage zones and secure reliable and non-stop system operation.
3. Build-up of united grid area, i.e. consolidation of grid assets to secure reliable supply of consumers and promote efficient development of the energy systems across the service regions.

Evolution of the Company’s production assets shall assist in implementing federal programs, All-Russia projects, regional programs and territorial development plans.
